

Smarter Third-Party Risk Management Built on Responsible AI.

Your vendors keep your business running, but they can also keep you up at night. Compliance gaps, security threats, and hidden costs often hide in dozens of risk categories and hundreds of data points.

When risk multiplies faster than you can track it, can your systems keep up?

With ComplyScore®, it can.

ComplyScore® - the Modern, AI-Augmented Third-Party Risk Management Product

ComplyScore® by Atlas Systems simplifies third-party risk management end-to-end. From onboarding to continuous monitoring, it transforms complex TPRM processes into a centralized, intelligent, and scalable workflow. With rapid due diligence, real-time risk visibility, and collaborative dashboards, ComplyScore® shortens assessment cycles, reduces costs, and keeps every stakeholder aligned. Your risk teams can act with clarity, speed, and confidence.

Business Impact at a Glance

Achieve **up to 95%**
(vs. industry avg 25-30%)

Onboarding:

In under **10 days**
(vs. industry avg 45-60 days)

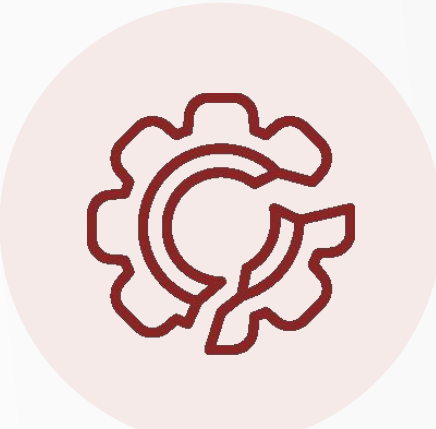

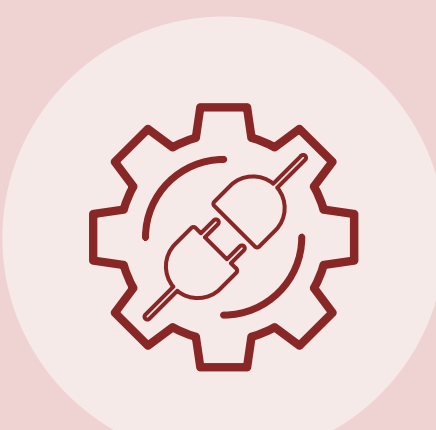

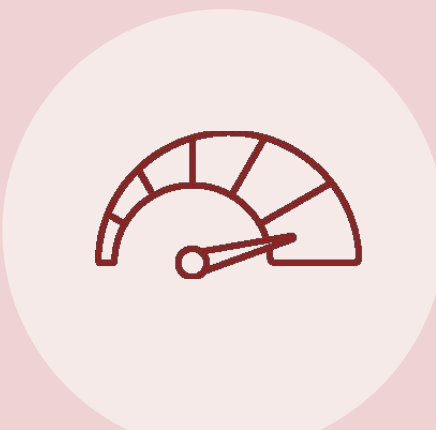

Assessment Cost:

Cut by **40-60%**

The Reality of Third-Party Risk

From day one, every signed contract triggers a stream of risks: financial, operational, cyber, compliance, and reputational. And they don't stop.

Without the right system	With ComplyScore®, the path is different
<div></div> <div>Noise takes over Generic dashboards hide what's urgent.</div>	<div></div> <div>Cut the noise Role-based access and widgets allow for customized interface to show each team only what matters.</div>
<div></div> <div>Assessments pile up No clear view of what's due or stalled.</div>	<div></div> <div>Track every assessment One place for all statuses and next steps.</div>
<div></div> <div>Remediation drifts Ownership is unclear, deadlines slip.</div>	<div></div> <div>Keep remediation moving Owners, deadlines, and outcomes are always clear.</div>
<div></div> <div>Monitoring alerts go nowhere Risks aren't tied to action.</div>	<div></div> <div>Turn alerts into action Continuous monitoring feeds directly into workflows.</div>
<div></div> <div>Data stays siloed Risk insights are disconnected from procurement workflows.</div>	<div></div> <div>Integrate risk into procurement API-first approach means no blind spots.</div>
	<div></div> <div>Give leaders instant clarity Live KPIs, no quarterly wait.</div>

Simplify Onboarding. Reduce Costs. Monitor Continuously.

From vendor onboarding to ongoing assurance, ComplyScore® turns third-party risk from reactive firefighting into a streamlined, data-driven process.

			
Onboard vendors 4-6X faster with AI-powered due diligence.	Reduce onboarding costs by up to 60% through automation.	Maintain continuous, real-time risk visibility across your vendor base.	Stay compliant with global, data privacy, and data residency requirements.

ComplyScore® Offers 360° Vendor Risk Lifecycle Coverage

Faster, Smarter Third-Party Due Diligence (TPDD)

Accelerate vendor risk assessments with AI-driven scoring based on scope, data access, and criticality, evaluated across multi-dimensional risk areas (e.g., InfoSec, Regulatory, Financial).

Vendor Profile Intelligence Engine

Automatically enrich vendor records with open-source data, subscription feeds (D&B, RiskRecon), and public registries for accurate, ready-to-use onboarding information.

AI-Prefilled Questionnaires + Smart Guidance for Vendors

Prefills industry-aligned questionnaires (e.g., SIG, SOC 2, ISO 27001, HIPAA) using past data and public signals. Guide vendors by highlighting which controls they meet or miss in real time.

Collaborative Workflows for Vendors and Assessors

Enable vendors and assessors to collaborate in one place to delegate tasks, track progress, and review together.

AI-Assisted Evidence and Control Review

Scan uploaded evidence (e.g., SOC 2 reports) to flag missing controls, check response consistency, and auto-suggest remediations.

AI-Generated Close-Out Reports and Recommendations

Generate detailed residual risk reports with maturity scores, open issues, and next steps.

Continuous Risk Monitoring Using Third-Party Feeds

Integrate with D&B, RiskRecon, SecurityScorecard, Shodan, and others to detect emerging risks, breaches, or posture changes, summarized into AI-generated alerts.

Workflow-Based Remediation and Exception Handling

Track findings with due dates, owners, and audit logs, with support for exception approvals, partial acceptances, and escalation workflows.

Executive Dashboards with Real-Time Risk Insights

Present real-time vendor tiering, criticality, overdue remediations, monitoring alerts, and engagement-level risk trends through executive dashboards that enable fast, data-driven decisions.

Targeted Risk Intelligence for Cost Savings

Buy third-party risk intelligence only for vendors that truly require it, reducing unnecessary spend and cutting assessment costs by 40–60%.

Trusted by Risk Leaders Across Industries

“

ComplyScore is highly responsive and adaptable to our evolving processes and requirements, proving to be a trusted partner at every step. Their security analysts were knowledgeable, flexible, and delivered exceptional services that consistently exceeded our expectations.

- Enterprise Client,
G2 Review (Jan 2025)

“

I have been using complyscore for several months and my experience has been largely positive. The platform provides comprehensive solutions for compliance management and streamlines our operations efficiently.

- Mid-Market Company,
Gartner Peer Insights (Sep 2024)

“

Atlas far exceeds expectations in terms of cost efficiency and ease of use
