Atlas PRIME® Has You Covered

PRIME® combines AI automation with expert human oversight to deliver what manual processes and point solutions can't: continuous accuracy, regulatory confidence, and member trust at significantly lower cost.

Agentic AI platform

validate → cleanse → monitor → integrate

6-layer data validation from provider websites to expert human outreach

80% Agentic AI verification with expert staff handling complex exceptions

Continuous accuracy, not quarterly batches

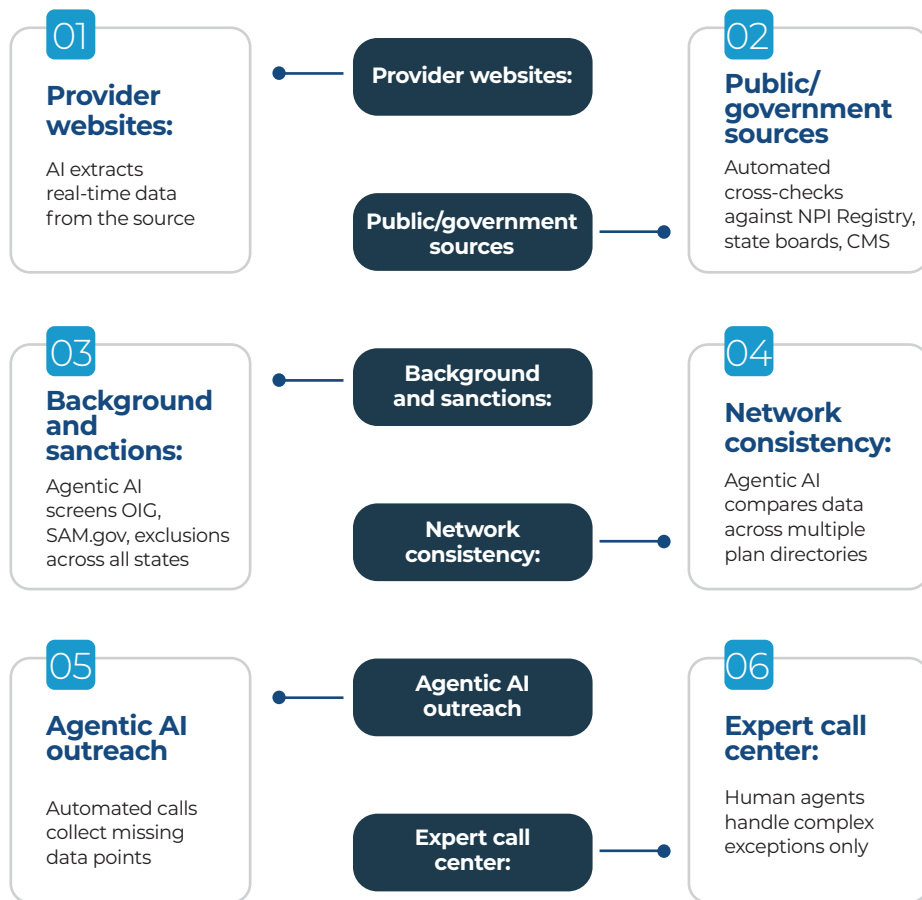

Audit-ready with full audit trail for regulators

The PRIME® Difference or Advantage? Complete Provider Data Management

Multi-Layered Provider Data Validation

Six verification layers combine Agentic AI automation with human expertise to ensure high accuracy at significantly lower cost than manual verification.

Enhanced Data Quality Checks

AI-powered quality assurance catches errors before they reach any system or member-facing channel.

- ▶ **Automated file interrogation** validates required fields, flags duplicates, verifies NPIs against NPPES, and standardizes addresses through USPS-compliant tools.
- ▶ **Claims-based activity analysis** uses AI to identify inactive providers and flag excessive service locations that signal low-activity sites.

CMS Mock Audit Preparation

Simulate secret shopper audits so you can pass real audits on first attempt. No corrective action plans, no penalties.

- ▶ **Test random provider samples** for phone accuracy, accepting patient status, appointment wait times. Practice audit protocols with zero risk.
- ▶ **Identify gaps, prioritize fixes, and document remediation** for full regulatory readiness.

Continuous Directory Monitoring

Agentic AI surveillance works 24/7 so you catch errors before members do.

- ▶ **Automated Agentic AI surveillance** for practice closures, license suspensions, Death Master File, disconnected phones. Alerts trigger re-verification workflows instantly.
- ▶ **Quarterly deep validation cycles** refresh your full network with comprehensive accuracy checks.

Validated Data, Ready to Use

Clean, verified provider data delivered in the format your systems need.

- ▶ **Flexible output formats** for credentialing systems, directories, claims platforms, or member portals.
- ▶ **Complete evidence package** with timestamped validation logs, source attribution, and recorded attestations proving every data point.

Why Leading Health Plans Make the Switch to PRIME[®]

Achieve 95% data accuracy that eliminates member complaints and plan switching Pass CMS secret shopp...

Reduce costs significantly and accelerate validation turnaround with automated workflows.

Pass CMS secret shopper audits on first attempt with no fines or corrective action plans
